WORK EXPERIENCES

Freelance Frontend Web Developer

Centarl-Tact Company

 **Aug 2022 - Sep 2022**

Working with a team of developers to make a call center software system for a central-tact company I handled a Frontend part of a website. This website contains SEO Performance, provides an online call center services and other services by making a website as a user-friendly to facilitate the website for the client and understand it.

PROJECTS

EVENT FLARE (Graduation Project)

 **Oct 2021 - Jul 2022**

I participated in a project which talked about event Management software system that helps event organizer to organize his event by management tools like booking tickets for client, taking attendance of clients and making dashboard to analyze all the updates through a website. I learned how to start up a new business in addition, I handled all the system part and part of frontend (admin dashboard part). I participated in the project as if I was planning to open a new business, and I learned how to make a system of our business, marketing this business and gain a profit throughout the year.
